

## Lab - Linux Firewall

### Jackson Hallahan

- This is an individual assignment and worth 5 points.
- The due is tonight.
- Submit the outcome file. Follow the naming convention.

### Task 1

- On Kali, create a rule that blocks ping requests [to the Kali machine](#).
- Go to the host machine and ping the Kali. [Take a screenshot of the output on the host machine](#).
- On Kali, display the rule you created. [Take a screenshot of the output](#).

```
C:\Users\jacks>ping 192.168.189.128

Pinging 192.168.189.128 with 32 bytes of data:
Request timed out.
Request timed out.
Request timed out.
Request timed out.

Ping statistics for 192.168.189.128:
    Packets: Sent = 4, Received = 0, Lost = 4 (100% loss),
C:\Users\jacks>
```

```
└──(kali㉿kali)-[~]
$ sudo su
└──(root㉿kali)-[/home/kali]
# iptables -A INPUT -p icmp --icmp-type echo-request -j DROP
```

```
└──(root㉿kali)-[/home/kali]
# sudo iptables -L -n -v
Chain INPUT (policy ACCEPT 2549 packets, 1797K bytes)
  pkts bytes target  prot opt in     out     source               destination
        4    240  DROP    icmp  --  *       *       0.0.0.0/0            0.0.0.0/0           icmp type 8

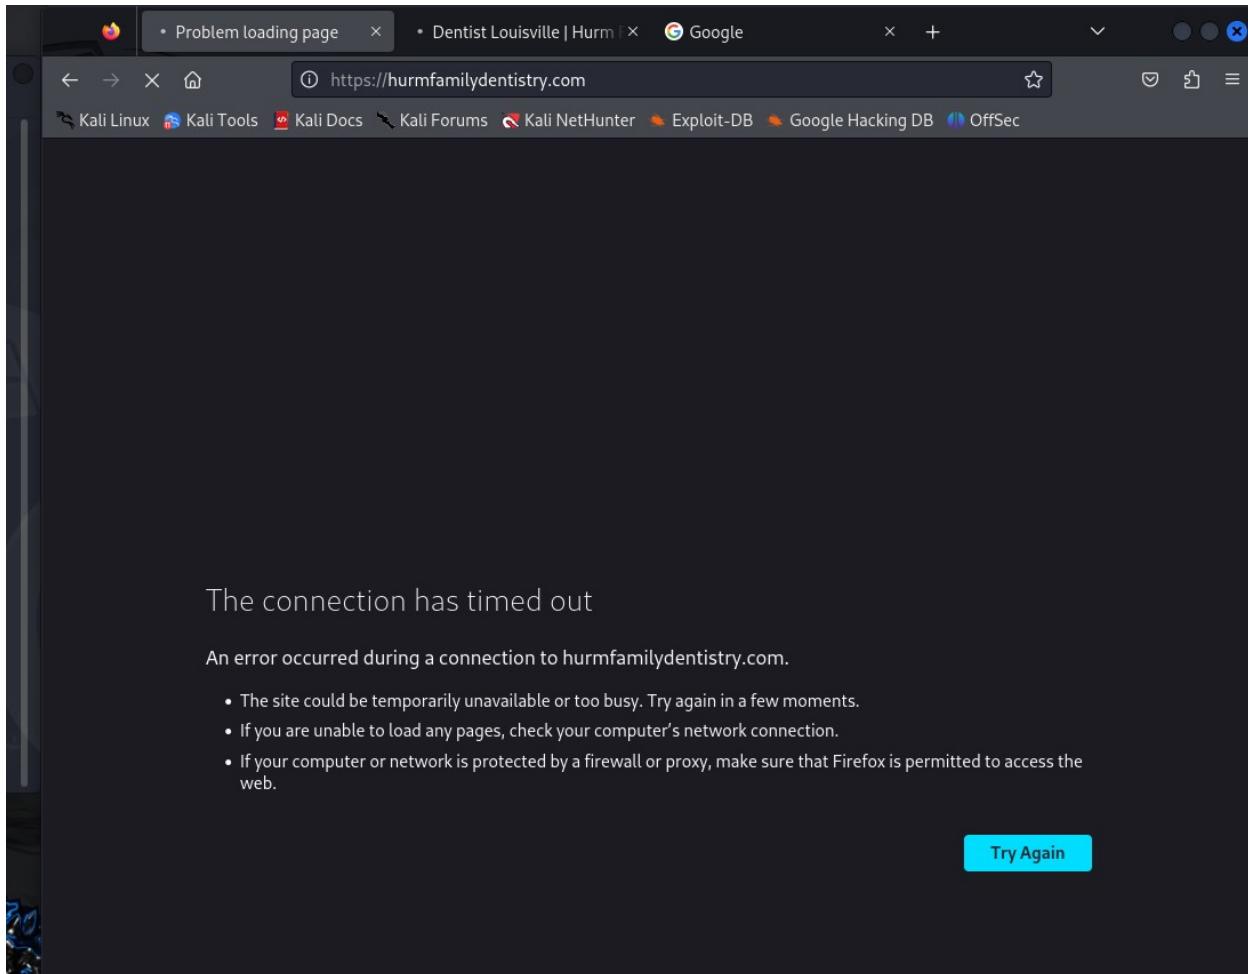

Chain FORWARD (policy ACCEPT 0 packets, 0 bytes)
  pkts bytes target  prot opt in     out     source               destination

Chain OUTPUT (policy ACCEPT 0 packets, 0 bytes)
  pkts bytes target  prot opt in     out     source               destination

└──(root㉿kali)-[/home/kali]
#
```

## Task 2

- On Kali, launch Firefox and visit [hurmfamilydentistry.com](https://hurmfamilydentistry.com). Make sure the website is displayed properly.
- Create a rule that blocks access to this site. On a separate tab of the browser, visit the site again and [show in a screenshot that the site now is not accessible](#).
- Display the rule you created. [Take a screenshot of the output](#).  
(Hint: watch the 2<sup>nd</sup> video in Tutorial 1).

```
[(kali㉿kali)-[~]]$ sudo iptables -A INPUT -s hurmfamilydentistry.com -j DROP
[(kali㉿kali)-[~]]$ sudo iptables -L -n -v
Chain INPUT (policy ACCEPT 22 packets, 1152 bytes)
  pkts bytes target     prot opt in     out     source               destination
    0     0  DROP        all    --  *       *       160.153.0.154      0.0.0.0/0

Chain FORWARD (policy ACCEPT 0 packets, 0 bytes)
  pkts bytes target     prot opt in     out     source               destination

Chain OUTPUT (policy ACCEPT 0 packets, 0 bytes)
  pkts bytes target     prot opt in     out     source               destination
```
